## Introduction

Welcome to VITO RingtoneEditor - the easiest solution for creating ringtones on the go. With this ringtone constructor you don't have to spend money on new ringtones anymore, make your own ringtones. We hope you'll enjoy the simplicity of VITO RingtoneEditor as we do our best to provide you with the best solutions for your mobile lifestyle.

## Requirements

Windows Mobile Standard (Smartphone) 2003/5.0/6.0/6.1

Windows Mobile Classic (Pocket PC) 2003/5.0/6.0/6.1

Windows Mobile Professional (Pocket PC Phone Edition) 2003/5.0/6.0/6.1

## Activation

Downloadable version of VITO RingtoneEditor is fully functional and has to be purchased and activated for further usage after 14-day trial period. Please purchase VITO RingtoneEditor at [www.vitotechnology.com](http://www.vitotechnology.com)

To activate:

connect your device to Internet

start VITO RingtoneEditor

go to Menu > Activate

type in your activation code from the e-mail you received from VITO after purchasing RingtoneEditor and press Activate now.

In case you can't connect to Internet from your pocket PC, activation will take more time:

- start **RingtoneEditor**
- go **Menu >About> Activate**
- press Activate button, type into the empty field the activation code from the email you received from VITO Technology after purchasing **RingtoneEditor**, choose "**I have no Internet**" and press Activate button below. The file "**send\_to\_support.txt**" was saved to "**\Program files\VITO\RingtoneEditor\License\**" folder.

Please finish activation in the Support section <http://vitotechnology.com/en/support/>.

On this page choose **off-line registration** in combo box to proceed with the off-line activation of your software.

To activate the program off-line make the following steps:

1. Press the button **Choose** and choose file **send\_to\_support.txt** that was created by the program
2. Having chosen the file press the button **Get License** and save the file with the license
3. Put the file with your license in the folder where the file **send\_to\_support.txt** is
4. Make sure that:  
the file with the license was named exactly as **license\_1.0.txt**  
the file is saved in Unicode format

*Note: as you can see on-line activation is much easier than the off-line variant, which can take considerably more time. We recommend you on-line activation.*

**The e-mails with activation codes are generated automatically, so if you didn't get the key, check your Spam Filters. Usually when you do not receive the key immediately the letter is put in junk.** If you have any questions or problems regarding the activation process, please contact our support at <http://vitotechnology.com/en/support/>.

## Recording ringtone

### ***Browse to audio files:***

The main screen that appears after you have started RingtoneEditor displays the list of folders on your device. Use joystick to find audio files and record a ringtone from them. Select the necessary file and press the left soft key Select.

### ***Start recording ringtone:***

After you press Select there appears a new window and the file starts to play after a short delay that gives you time to look around and find the left soft key Start. While music is playing you choose the beginning for your ringtone and press Start.

### ***Finish recording ringtone:***

After you press Start and Confirm both onscreen button and the left soft key change to Finish. While the file is playing you can also fast forward or rewind using joystick right and left buttons correspondingly. Now you listen until you think it's enough for the ringtone and press the left soft key Finish to mark the end of your ringtone.

### ***Set exact start or finish position:***

When you recorded a ringtone, you can set exact start and finish position by pressing **Exact edit**:

The beginning of your ringtone starts repeating for you to choose the exact start position. To move the start moment backwards or forward, use the corresponding arrows. After you have chosen the exact start moment press Confirm.

The ending of your ringtone starts repeating for you to choose the exact finish position. To move the finish moment backwards or forward use the corresponding arrows. After you have chosen the exact finish moment press Confirm.

## **Saving ringtone**

### ***Previewing ringtone:***

After you press Finish and Confirm the ringtone is ready. It's a good idea to listen to the created ringtone before assigning it. Choose Play to do it.

### ***Saving ringtone:***

If you do not want immediately assign the created ringtone as default, press Save ringtone. It will be saved to Windows\Rings on Pocket PC and to My Documents on Smartphones. You can assign it later as a ringtone using default software. On Pocket PC from Start > Settings > Phone > choose your ringtone in the list of default ringtones in the dropdown menu. On Smartphone from Start > Settings > Sounds > choose your ringtone by pressing left or right. You may create new ringtones now.

### ***Assigning ringtone:***

If you like your new ringtone, press the left soft key or choose Assign as ringtone in the menu to immediately assign it as a default ringtone. There will appear a small window while the ringtone is being optimized and saved to Windows\Rings. After the ringtone is assigned RingtoneEditor automatically closes.
