Introduction

Welcome to SMS-Chat, the easiest solution to manage your SMS messaging. We hope you'll enjoy using SMS-Chat as we do our best to provide you with the best solutions for your mobile lifestyle.

Requirements

Windows Mobile Professional (Pocket PC Phone Edition) 5.0/6.0/6.1

Activation

Downloadable version of SMS-Chat is fully functional and has to be purchased and activated for further usage after 14-day trial period.

To activate:

- connect your device to Internet
- start **SMS-Chat**
- go **Menu > i (About) > Activate**
- type in your activation code from the e-mail you received from VITO after purchasing SMS-Chat and press **Activate now**.

In case you can't connect to Internet from your pocket PC, activation will take more time:

- start **SMS-Chat**
- go **Menu > i (About) > Activate**
- press Activate button, type into the empty field the activation code from the email you received from VITO Technology after purchasing **SMS-Chat**, choose **"I have no**

Internet” and press **Activate** button below. The file “**send_to_support.txt**” was saved to “\Program files\VITO\SMS-Chat\License\” folder.

Please finish activation in the Support section <http://vitotechnology.com/support.php>.

On this page choose **off-line registration** in combo box to proceed with the off-line activation of your software.

To activate the program off-line make the following steps:

1. Press the button **Choose** and choose file **send_to_support.txt** that was created by the program
2. Having chosen the file press the button **Get License** and save the file with the license
3. Put the file with your license in the folder where the file **send_to_support.txt** is
4. Make sure that:
the file with the license was named exactly as **license_1.0.txt**
the file is saved in Unicode format

Note: as you can see on-line activation is much easier than the off-line variant, which can take considerably more time. We recommend you on-line activation.

The e-mails with activation codes are generated automatically, so if you didn't get the key, check your Spam Filters. Usually when you do not receive the key immediately the letter is put in junk. If you have any questions or problems regarding the activation process, please contact our support at <http://vitotechnology.com/support.php>.

Main Window

It contains all SMS chats that you have on your device. They are sorted by date, the chats with the most recent messages are displayed first. The chat with a new message is marked with the yellow envelope.

To access Main Menu, tap  in Main Window. There are the following options:

To minimize program, tap **minimize button**

To exit, tap **cross button**

To open About, press icon **i (information)**

To switch on or switch off the notifications tap **Notifications**

To create or edit your templates, tap **templates**

To return to SMS-Chat, tap **cancel**

To change interface language, go **Menu > Language**
